ASIANZU BENJAMIN CHRIS

Data Analyst • Business Intelligence • Healthcare Data

+256 780 165 621 • b3ntana@gmail.com • Kampala, Uganda (Open to Remote)

chris-asianzu.github.io • github.com/chris-asianzu • linkedin.com/in/chris-asianzu-9b52a538b

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building end-to-end analytics systems across e-commerce, healthcare, retail, and HR analytics. Delivered a live health records system at Maracha Hospital (West Nile, Uganda) and a machine learning disease outbreak prediction system achieving 84% model accuracy. Built and deployed a live Community Disease Surveillance Dashboard (Streamlit) tracking fever and malaria clusters across 4 Ugandan districts. Microsoft Certified Data Analyst Associate. Open to full-time remote roles in data analytics, business intelligence, or health informatics.

CORE COMPETENCIES

Languages & Tools: Python (pandas, numpy, matplotlib, seaborn), R (ggplot2, tidyverse), SQL (PostgreSQL, MySQL), Excel

Visualization: Power BI (DAX, data modeling, KPI dashboards), Tableau, Streamlit, ggplot2, matplotlib

Analytics: Cohort analysis, RFM segmentation, churn modeling, funnel analysis, CLV, association rule mining, demand forecasting

Data Engineering: ETL pipelines, KoboCollect/KoboToolbox API, SQLAlchemy, SQLite, database design, Git/GitHub

Domain Expertise: Healthcare informatics, e-commerce analytics, marketing analytics, retail inventory, HR analytics

Soft Skills: Data storytelling, executive reporting, curriculum design, stakeholder communication

PROFESSIONAL EXPERIENCE

Data Analyst & IT Officer | Muni Labs, West Nile, Uganda

2023 – Present

- Led data analysis and system development for the Maracha Hospital Data Science Project — a live health records system deployed at St. Joseph's Hospital, Maracha, improving patient data management in a rural healthcare setting.
- Built and deployed a Community Fever & Malaria Surveillance System — mobile data collection via KoboCollect, Python ETL pipeline, SQLite database, and a live Streamlit dashboard with district heatmaps and weekly fever/malaria trend analysis across 4 Ugandan districts.
- Designed and delivered a 12-week Introduction to Data Analysis course for the Graduate Studies Academy — now in its 5th cohort, training students from Ugandan universities and working professionals across agriculture, health, and education.
- Provided ongoing IT support including web development, software solutions, and data systems for NGO operations.

Freelance Health Data Analyst | Regional Public Health NGO, East Africa (NDA)

2024

- Contracted to build a predictive analytics system for early disease outbreak detection across 45 districts in East Africa.
- Integrated 7 years of multi-source surveillance data (180,000+ observations): district health offices, NASA climate datasets, World Bank demographics.
- Final model: Random Forest — 84% accuracy, ROC-AUC 0.89, recall 0.81. Estimated 28% reduction in malaria cases through early intervention.
- Delivered Power BI dashboard with national risk heatmap, 30-day outbreak probability forecasting, and intervention prioritization panel.

Course Instructor – Python & Programming | ReedInc Org, West Nile, Uganda

Feb 2024

- Developed and delivered beginner Python programming curriculum covering fundamentals, algorithmic thinking, and applied problem solving.

WordPress Developer | Freelance

Oct 2022 – Present

- Designed and developed custom WordPress websites; ongoing maintenance, security updates, and plugin customization.

Biochemistry Teacher | Secondary School, Uganda

2023 – Present

- Teach O-level and A-level Biology and Chemistry aligned to Uganda National Curriculum.

KEY PROJECTS

E-Commerce Revenue Intelligence System

Flagship | github.com/chris-asianzu/ecommerce-revenue-intelligence

- Analyzed 98,666 orders across 3 years. Found 87.7% churn rate with R'1.38M recoverable revenue.

- Affiliate channel delivers 4x ROI vs social media. Full pipeline: Python → PostgreSQL → Power BI → executive board presentation.
- Tools: Python, PostgreSQL, Power BI, pandas, SQLAlchemy

Community Fever & Malaria Surveillance

Live Dashboard — Built with Abiyo Bruce | community-fever-surveillance.streamlit.app

- End-to-end digital surveillance: KoboCollect mobile form → Python ETL via KoboToolbox API → SQLite database → live Streamlit dashboard.
- Interactive district heatmaps, weekly fever trends, mosquito net vs malaria positivity analysis. 1,000 records, 4 Ugandan districts.
- Tools: Python, KoboCollect, KoboToolbox API, SQLite, Streamlit, folium, pandas

Retail Inventory & Sales Optimization

Case Study | github.com/chris-asianzu/retail-store-inventory-optimization

- Three-branch supermarket. Branch C leads at $110,569 with 5.58x turnover. Modeled reorder thresholds — estimated 9% revenue recovery.
- Tools: MySQL, Window Functions, Demand Modeling

Bank Marketing Campaign Performance

Case Study | github.com/chris-asianzu/marketing-campaign-analysis

- 45,211 contacts. Previous converters re-convert at 64.7%. Cellular beats telephone by 2.8x. ROI improvement: 20-28%.
- Tools: Power BI, DAX, Conversion Analysis

Supermarket Basket Analysis

Case Study | github.com/chris-asianzu/supermarket-basket-analysis

- Association rule mining on supermarket transactions. Identified product bundling opportunities and cross-sell patterns.
- Tools: Python, SQL, Association Rules, Market Basket Analysis

Real Estate Price Analysis

Dual Tool | github.com/chris-asianzu/real-estate-price-analysis

- Tableau vs Power BI comparison on real estate price trends. Geographic heatmaps in Tableau, advanced DAX calculations in Power BI.
- Tools: Tableau, Power BI, DAX, Geographic Analysis

Employee Attrition Analysis

R Project | github.com/chris-asianzu/Employee-attrition-analysis

- Statistical analysis of employee attrition using R. Hypothesis testing, logistic regression model, ggplot2 visualizations.
- Tools: R, ggplot2, tidyverse, Logistic Regression, Hypothesis Testing

SQL Mastery Repository

25 Business Queries | github.com/chris-asianzu/sql-mastery-repository

- 25 production-quality queries: cohort analysis, RFM scoring, CLV, funnel analysis, Pareto, recursive CTEs, gap-and-island.
- Tools: PostgreSQL, Window Functions, CTEs

EDUCATION

Bachelor of Science in Education (Biology & Chemistry) | Muni University, Arua, Uganda — Feb 2023

Uganda Advanced Certificate of Education | Our Lady of Africa SS, Mukono — Dec 2017

CERTIFICATIONS

- Microsoft Certified: Data Analyst Associate (Power BI)
- Certified Python Programmer — DataCamp, 2024
- Certified R Programmer — R Foundation, 2022
- Data Analysis with Python — freeCodeCamp
- Career Skills in Data Analytics — LinkedIn Learning
